# F.01 Fabric Wall System

With a design based on our long established Peerless-Assigns slotted upright merchandising system, FABRIC WALL is designed to offer aesthetic versatility in store, allowing the user to change the look and feel of their retail space quickly, cheaply and easily, using printed fabric graphics which are suspended within the frames. Available as a standard kit at 600mm and 1200mm slot centres the FABRIC WALL system thrives in a range of environments from department stores to boutique high street shops. Eliminating the need for traditional MDF back panels, this system is surface mounted (providing use of suitable wall fixings) and is easily installed.

The FABRIC WALL system is supplied in 4 separate kits, an all-in-one frame, a Starter, Extension and Finishing kit. These are available in standard 600 and 1200mm bay widths and a fixed 2235 nominal height, which can be used to create an endless combination of wall displays. Please see diagram below.

All 4 kit variations are supplied with 4 no. CL.01 fixing 'L' brackets. For ease of construction, all profiles are mitred at 45 degrees both ends. Simply slide the two profiles flush then fix in place with 4 screws supplied.

# F.02 Fabric Wall System

Unlike conventional vertical merchandising systems, the FABRIC WALL system is not constrained to the properties of traditional wooden back-panels. Printed fabric panels offer retailers the freedom of choice, but perhaps more importantly the ability to tailor displays, be that to changes in season or desired shop aesthetic. The days of generic store rollout are gone, the FABRIC WALL system offers retailers the freedom of expression; shop displays can now be modified to suit audiences they serve.

### SO, WHAT'S IN MY KIT?

All kits are comprised of a mitred aluminium frame (see data sheet F.01), 4 fixing brackets and a printed fabric panel to suit 600 or 1200mm widths. If you choose to illuminate the bay, an additional LED lighting panel can be added to the kit.

#### ALUMINIUM FRAME

Whether you order single or multiple kits, the frame pieces are supplied in kit form ready to assemble and then fixed to a wall. (Refer to datasheet F.01 for product codes)

#### FAB.60/120

PRINTED FABRIC WITH RUBBER EDGING  
Choose from our library of high-res images or provide your own based on our artwork template

#### CL.01

##### FIXING 'L' BRACKET

Supplied with screws required to fix the bracket in place, simply slide extrusions together flush and turn hex key till tight.

#### IP.60/120

#### EX.60i

Extension bay with a 600 wide graphic and LED light panel

#### EX.120

Extension bay with a 1200 wide graphic

#### FI.60

Finisher bay with a 600 wide graphic

#### FR.60

All-in-one frame with 600 wide graphic

# F.03 Fabric Wall System

All of the Peerless-Assigns slotted upright profiles feature the same Peerless-Assigns slot pitch to ensure consistency throughout. All Peerless-Assigns components designed for use in a vertical system, from rails to brackets, are suitable for use on the FABRIC WALL system. This system offers retailers the flexibility of changing back panels and the modularity of a slotted upright system.

## MERCHANDISING SYSTEM

Okay, so you have your complete printed FABRIC WALL, now time for the fittings. Our standard selection aims to accommodate most retail merchandising requirements, but if you are looking for something bespoke, don't worry, we provide a custom-made production service for all of your bespoke system needs.
